

Container Garden *Checklist*

My biggest tip for purchasing flowers to coordinate in pots is: Grab a garden box at the center, place it in your cart and then add flowers and plants you like to the box. As you see them next to each other you will be able to tell if the colors look good together or not. If some clash, remove them and try again until what you see in your cart is pleasing to your eye.

SUPPLIES

- Potting soil.** (Organic or doesn't have chemical fertilizer added)
- Organic, slow release fertilizer.**
- Garden trowel**
- Small snips or pruners**
